**EXPERIMENT 10: Library Management System using excel**

Aim

To categorize the requirements of a Library Management System using the MoSCoW prioritization method in Microsoft Excel and justify each requirement based on user impact, feasibility, time, budget, and available resources.

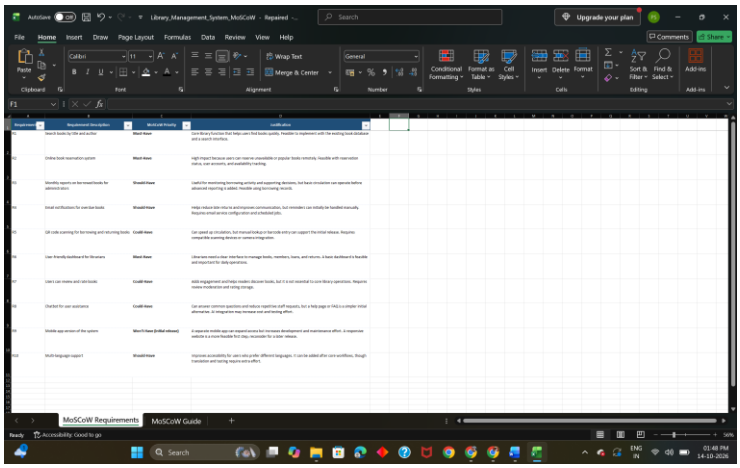

2. Software Used

- Microsoft Excel
- Feature used: Format as Table, Filter, Sort, Wrap Text, and Cell Formatting.

3. Procedure

1. Open Microsoft Excel and create a new workbook.
2. Enter the column headings: Requirement ID, Requirement Description, MoSCoW Priority, and Justification.
3. Enter all 10 Library Management System requirements in separate rows.
4. Assign a priority to each requirement: Must-Have, Should-Have, Could-Have, or Won't-Have.
5. Enter a justification explaining the importance and feasibility of each requirement.
6. Select the entire data range, including the headings.
7. Click Home → Format as Table and choose a suitable table style.
8. Enable My table has headers and click OK. Filter drop-down arrows will appear beside the column headings.
9. Use the filter arrows to display requirements by priority. Use the Sort option to arrange the requirements alphabetically or by another selected criterion.
10. Adjust column widths, enable Wrap Text, and save the workbook as

**4. Output**

**RESULT:**The Library Management System requirements were prioritized and justified using the MoSCoW method in Microsoft Excel. The formatted table, sorting, and filtering features make the requirements easy to organize, compare, and review for project planning and stakeholder discussions.
