EXPERIMENT 3: The stakeholders have conflicting views on the user interface design for an E-Commerce mobile app. Create a prototype using Figma tool to discuss with the stakeholders to get their feedback and approval.

1. Aim

To create an interactive prototype of an E-Commerce mobile application using Figma to present UI design options, collect stakeholder feedback, and obtain approval for the final design.

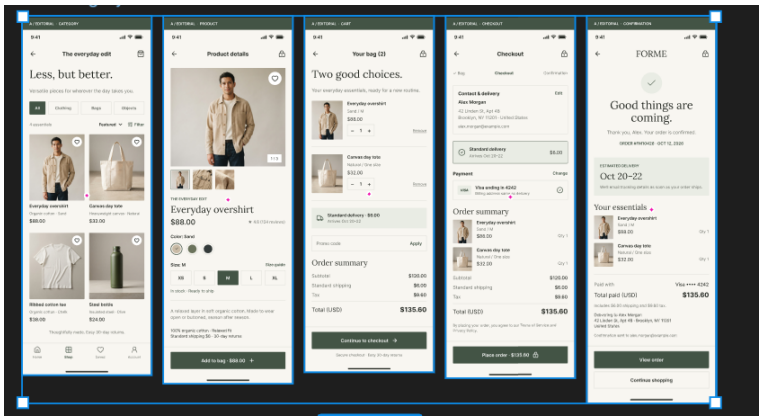

2. Software Used

- Software: Figma
- Purpose: UI/UX design, interactive prototyping, and stakeholder feedback.

3. Procedure

1. Open Figma and create a new design file.
2. Design a mobile home screen with a search bar, product categories, and banners.
3. Create product listing, product details, shopping cart, and checkout screens.
4. Prepare alternative UI designs to address the stakeholders' different preferences.
5. Connect the screens using Prototype mode to demonstrate the shopping workflow.
6. Share the prototype link with stakeholders and collect their feedback.
7. Revise the design based on feedback and obtain approval for the final version.

4. Output

RESULT: The has been design and verified in figma tool
